

Complete the Circle of Visible Learning for Your Students

Becoming a Visible Learner

The power of Visible Learning is simple yet transforming: Help your students understand how to learn, and they can become their own teachers.

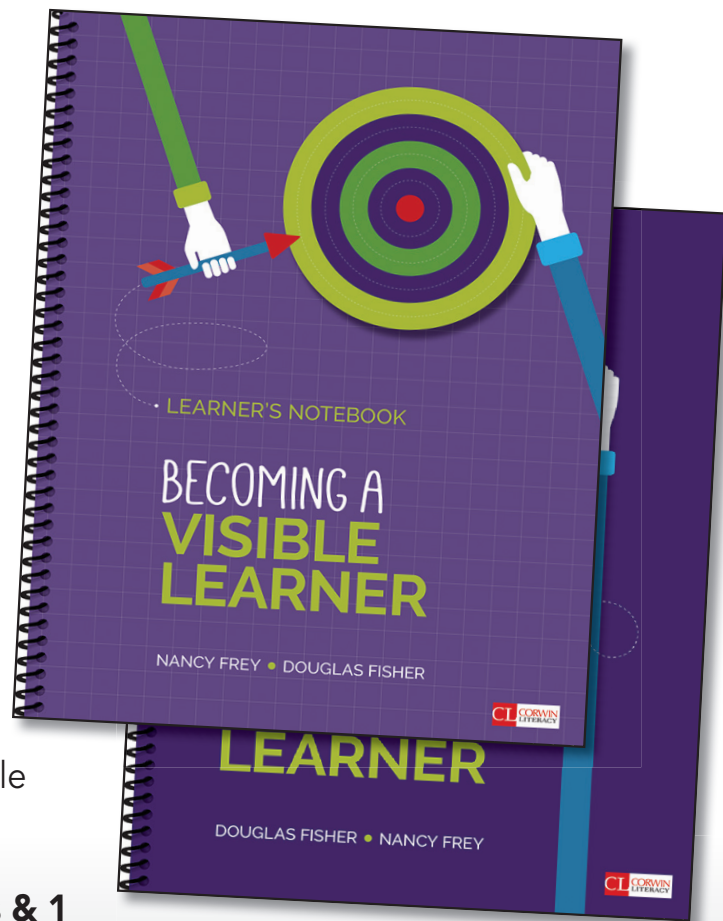

These learner's notebooks are the first of their kind to complete the circle of Visible Learning by helping students monitor their own progress. With an emphasis on developing and strengthening foundational metacognitive skills, the notebooks guide students to understand what they're learning, why they're learning it, and the strategies they need along the way.

Learners become more focused because they know where they are going in their learning and are able to choose the right tools to arrive at their destination. Each classroom set of 20 learner's notebooks comes with a FREE *Becoming a Visible Learner's Teacher's Guide* that walks you step-by-step through the process of using the *Learner's Notebook* to help your students thrive as visible learners.

Designed for fast and easy implementation, and structured to support an entire school year's worth of learning, the resources in this classroom set provide you with everything you need to bring Visible Learning success to every learner in your classroom.

Classroom Packs Include 20 Learner's Notebooks & 1 Teacher's Guide, List Price: \$260.00

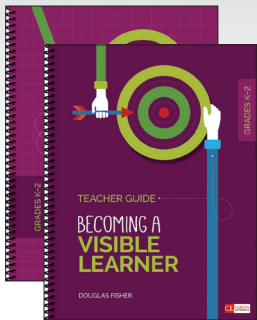

Becoming a Visible Learner 10 pack includes 10 learner's notebooks, List Price: \$130.00
