

CUMULATIVE PHONICS MASTERY CHECK

WEEKLY ASSESSMENTS (GRADE 1)

Directions for Administration

1. Make a copy of the assessment form for each student you are assessing in a given week. Assess six to eight students per week so that each student is assessed at least once per month.
2. Make a copy of the assessment for the student to read. Ask the student to read each word in order. The word list for each week includes words with the week's target phonics skills and words with skills from the previous five weeks to monitor mastery over time.
3. Put a check mark in the first box if the student accurately reads the word.
4. Put a check mark in the second box if the student automatically reads the word (fast—not slow or labored decoding).
5. If the student makes an error, record the error beside the word. Analyze the student errors for patterns that can inform small group instruction.
6. Score the assessment. The number or percentage read accurately indicates progress in learning the assessed phonics skills. The number or percentage read automatically indicates mastery (fluency).

Optional Administration

Administer the entire Cumulative Phonics Assessment to six to eight students each week (so that you see each student at least once per month). Since you are assessing a large set of skills, stop the assessment if the student misreads more than four words in a row (to avoid frustration early in the year).

Monitor those skills students have mastered (i.e., those they can automatically and accurately decode over an *extended* period of time). Take note of those skills further in the sequence that students have an awareness of or can easily decode. Form differentiated instruction groups accordingly.
