## FIVE STAR REVIEWS

"*The Formative 5* (Corwin and NCTM, 2017) was a must-read book for anyone teaching math, providing a wealth of practical guidance for teachers to make good formative assessment part of their regular planning and instruction. In *The Formative 5 In Action*, the authors take things to the next level, expanding the scope of the book to include high school math, providing even more practical guidance, supplemented by video resources that provide key insights from teacher and students, and illustrations of what really great formative assessment looks like in real classrooms. Anyone teaching math in K-12 needs this book in their professional library. Quite simply, it's a game changer."
