

Downloading Music

You are trying to decide which service you should use to download music. TUNE IN charges \$1.00 for each song you download, plus an \$8.00-per-month membership charge.

NOTEABLE charges 50¢ for each song you download, plus a \$12.00-per-month membership charge. How many songs would you have to download in a month before NOTEABLE is a better deal? Explain your reasoning.
