Figure 5.2 Program Logic Model Example: Building Academic Engagement

Academic Engagement

Needs	Inputs	Activities	Outputs	Impact
Research-based articles on academic engagement	Research-based articles	PLC meetings will be used to create a common understanding around "academic engagement."	**Groups of teachers will pilot teacher clarity strategies.**	We will see an increase in academic engagement among our students.
Examples of different instructional strategies	**Models of successful practices**	PLC will engage in a deep discussion of Claxton's engagement strategies and reflect on which strategies they are already using.	Part of teacher clarity will be to utilize strategies that increase classroom discussion.	
Read Claxton's article on engagement		Instructional leader will attend PLC discussions and talk with teachers about which elements should be included on walkthrough feedback form.	Principal's walkthroughs will help provide feedback incorporating Claxton's strategies to increase student engagement.	
Create surveys asking students how they believe they best learn	**Time to discuss the concept of academic engagement**	**Send surveys to the students in the classrooms where the pilot program will take place.**
