

## Paragraph Frame for Streaming Services

Among the three options for video streaming services, *[your claim]* is the best choice. Unlike *[one of the options you didn't choose]*, which offers *[data point]* and *[data point]*, *[your claim]* is a better option because it offers *[data point]* and *[data point]*. When it comes to choosing a video streaming service, the most important thing to consider is *[warrant]*. However, if *[give a condition in which your warrant wouldn't apply]*, *[choose another service]* might actually be a better choice because *[give data to support an alternative choice]*.
