

# Rates, Ratios, and Proportions Assessment

## Solve:

1. A candy company found that 160 of their wrappers were not sealed in week 1. The company sold 2,000 candies in week 1. How many of the 3,400 candies sold in week 2 should they expect to be sealed correctly? \_\_\_\_\_
  
2. It took 11 hours to drive 71 miles. What is this speed per hour? \_\_\_\_\_

## Find each unit rate.

3. Twenty laptops weigh 90 pounds. \_\_\_\_\_
  
4. Lin makes \$107.25 in 6.5 hours. \_\_\_\_\_
