To

Proof:

to = ~~so, also, three~~

Ex:

She drove the car <u>to</u> town. ~~(so, also, three)~~

PRACTICE THE CONVERSATION:

A: Will you please read the sentence?

B: *She drove the car to town.*

A: Perfect. Which *to* did you use?

B: T-o.

A: I think it should be *too.*

B: Nooo. *She drove the car so town.*

A: That doesn't work, does it?

B: *She drove the car also town.*

A: Nope, that sounds crazy.

B: *She drove the car three town.*

A: That's not the right proof either, is it? You're right! None of those proofs works.

B: So it's t-o.

A: You're absolutely right!
