

April 24

The Water Cycle

The water cycle is cool. I wish I was a tiny rain drop so that I could live in a cloud. But that's not important right now. What's important is that people are ruining it. I know we have enough resources for ^(your) **our** lives. But what about ^(your) **our** kids, and ^(your) **our** grandkids' lives? I can think of so many ways to stop pollution and wastefulness. Instead of using ^(your) **our** gasoline cars, why don't we just use electric cars? And instead of using ^(your) **our** power lines and electricity, why don't we use solar power? I'm not one of those people who devotes her life to saving the planet. But I do want to make a point.
