

Map Locations on a Coordinate Plane

Dr. Graham has collected data about her patient's growth. The points show the age and the number of inches grown since each person's last birthday.

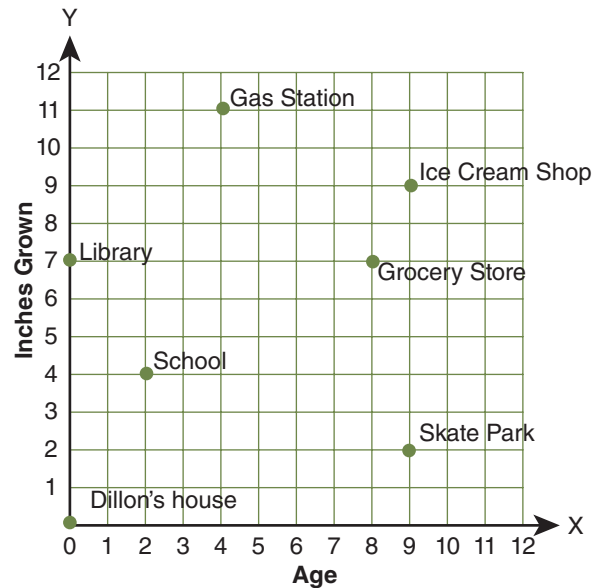

- Who has grown the most since their last birthday?

- What is the total number of inches grown?

- How many more inches did Dallas grow than Ken?

Dillon wanted to make a map of his neighborhood, so he graphed the locations of several places he visits.

- There is a video game store halfway between the library and the grocery store. At what coordinates should Dillon graph the video game store?

- What is the farthest place from Dillon's house?
