

## 4.5 Area is Additive: Finding Areas of Rectilinear Figures Recording Sheet

How many units squares do you think it will take to cover the figure below?

Cover the figure with unit squares. Use one color for the large rectangle and another color for the small rectangle.

How many unit squares did it take to cover the large rectangle of the figure?

How many unit squares did it take to cover the small rectangle of the figure?

How many unit squares did it take to cover the entire figure?

How many units squares do you think it will take to cover the figure below?

Cover the figure with unit squares. Use one color for the large rectangle and another color for the small rectangle.

How many unit squares did it take to cover the large rectangle of the figure?

How many unit squares did it take to cover the small rectangle of the figure?

How many unit squares did it take to cover the entire figure?

How many units squares do you think it will take to cover the figure below?

Cover the figure with unit squares. Use one color for the large rectangle and another color for the small rectangle.

How many unit squares did it take to cover the large rectangle of the figure?

How many unit squares did it take to cover the small rectangle of the figure?

How many unit squares did it take to cover the entire figure?
