

April 10

Journal, you know how medicine boxes always say “now made with real fruit”

or “new fruit flavor!”? Well journal, that’s a bunch of bull. I think that whoever

makes the medicine has never tasted fruit. Whenever something says cherry,

grape, or lemon, they really mean liquid cardboard, more sour than ever, and

AAH!! get this out of my mouth! I’m supposed to believe that there’s actually

fruit in the medicine if I can’t pronounce anything in the ingredients?!

Oh well

More tomorrow

BYE!

P.S. medicine smells like plastic, alcohol, and hospitalish
