

# SENTENCE FRAMES FOR WATER TOWER TASK

CLAIM:

The volume of the water tower is \_\_\_\_\_.

EVIDENCE:

Draw a diagram of the water tower and label each component with your measurements.

The water tower can be modeled as a composite shape that is part \_\_\_\_\_, part \_\_\_\_\_, and part \_\_\_\_\_. The volume of each of these parts, based on our measurements, is \_\_\_\_\_, \_\_\_\_\_, and \_\_\_\_\_. [Include calculations and relevant formulas.]

REASONING:

Therefore, the total volume is found by \_\_\_\_\_ and is \_\_\_\_\_.

The way that my team measured \_\_\_\_\_ was \_\_\_\_\_.

We also measured \_\_\_\_\_ by \_\_\_\_\_.
