

Student Behavior Analysis and Support

Observe one of your students who often does not follow community agreements and procedures. Describe the behaviors you observed and consider what may have been the causes. (Refer to the questions in the Intervention Checklist found on page 224).

List interventions you have tried and how have they worked.

Brainstorm three new things to try that will better meet the student's need, based on the causes of the behavior.

What were the results after trying out those strategies?

What are your next steps for supporting positive behaviors?
