Teaching Math to Multilingual Students, Grades K-8

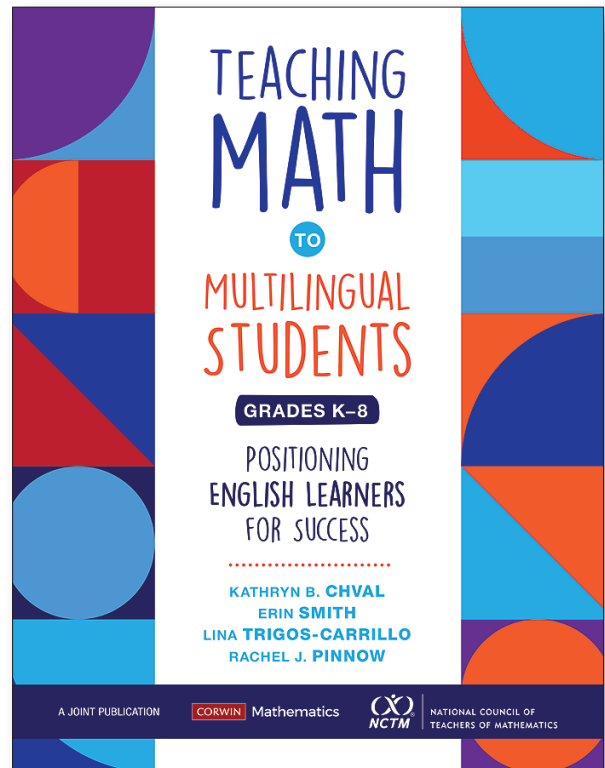

Positioning English Learners for Success

Kathryn B. Chval, Erin Smith, Lina Trigos-Carrillo, Rachel J. Pinnow

It's time to re-imagine what's possible and celebrate the brilliance multilingual learners bring to today's classrooms. As the number of multilingual learners in North American schools grow, many teachers have not had opportunities to gain the competencies required to teach these learners effectively, especially in disciplines such as mathematics.

Based on best practices and the authors' years of research, this guide offers practical approaches that equip grades K-8 teachers to draw on the strengths of multilingual learners, partner with their families, and position these learners for success. Readers will find:

- A focus on multilingual students as leaders
- A strength-based approach that draws on students' life experiences and cultural backgrounds
- Strategies for representing concepts in different formats
- Stop and Think questions throughout and reflection questions at the end of each chapter
- Try It! Implementation activities, student work examples, and classroom transcripts
