## Teaching Math at a Distance, Grades K-12

### A Practical Guide to Rich Remote Instruction

Theresa Wills

In an age when distance learning has become part of the “new normal,” educators know that rich remote math teaching involves more than direct instruction, online videos, and endless practice problems on virtual worksheets.

Using both personal experience and those of teachers in real K-12 online classrooms, distance learning mathematics veteran Theresa Wills translates all we know about research-based, equitable, rigorous face-to-face mathematics instruction into an online venue.

This powerful guide equips math teachers to:

- Build students’ agency, identity, and strong math communities
- Promote mathematical thinking, collaboration, and discourse
- Incorporate rich mathematics tasks and assign meaningful homework and practice
- Facilitate engaging online math instruction using virtual manipulatives and other concrete learning tools
