Partnering with Parents in Elementary School Math

A Guide for Teachers and Leaders

Hilary Kreisberg, Matthew L. Beyranevand

Partnering With Parents in Elementary School Math provides educators with long overdue guidance on how to productively partner and communicate with families about their children's mathematics learning. It includes reproducible surveys, letters, and planning documents that can be used to improve the home-school relationship, which in turn helps students, parents, teachers, and education leaders alike. Readers will find guidance on how to:

- Align as a school and set parents' expectations about what math instruction their children will experience and how it will help them
- Communicate clearly and productively with parents about their students' progress, strengths, and needs in math
- Coach parents to portray a productive disposition about math in front of their children

Educators, families, and students are best served when proactive, productive, and healthy relationships have been developed with each other and with the realities of today's math education. This guide shows how these relationships can be built.
