

# Guiding Questions for Content Matters

## Content Matters

When considering any SJML, ask yourself:

- How will the lesson contribute to the learning goals for my class?
- How does this lesson contribute to developing students' deep understanding of mathematics? How does the lesson empower students mathematically?
- How does the lesson connect to an issue that is relevant to my students?
- How does the lesson promote anti-bias education by addressing prejudice reduction and/or collective action? Which domain of the Social Justice Standards are addressed? Which Social Justice Standard?
- How does the SJML allow students to use mathematics as a sociopolitical tool of analysis?
