

# Guiding Questions for When Matters

When Matters
<p>When considering any SJML, ask yourself:</p> <ul style="list-style-type: none"><li>• How does this SJML build on previous lessons or preview future lessons, both with respect to mathematics and social justice goals?</li><li>• How does this SJML integrate learning goals across content areas (e.g., social studies, science, literacy)?</li><li>• What might my students already know about the mathematics and social justice topic of this SJML?</li></ul>
