Give Some to Get Some: Fractions

Directions: Take turns rolling a number. Choose a space on the gameboard where the amount you roll could be given to one factor to make a whole. Solve that problem to claim the space. The game ends when all spaces are covered. The player with the most three-in-a-rows wins.

$3\frac{7}{8} \times 5$	$4 \times 6\frac{3}{4}$	$7\frac{7}{8} \times 4$	$12 \times 2\frac{5}{6}$	$3 \times 4\frac{3}{4}$
$4 \times 2\frac{8}{9}$	$6 \times 4\frac{5}{6}$	$3\frac{7}{9} \times 6$	$3 \times 5\frac{4}{5}$	$8\frac{7}{8} \times 5$
$4 \times 5\frac{3}{5}$	$2\frac{9}{10} \times 4$	$4 \times 2\frac{4}{5}$	$2\frac{3}{4} \times 8$	$7\frac{5}{6} \times 6$
$7\frac{9}{10} \times 8$	$4 \times 2\frac{7}{9}$	$5\frac{8}{10} \times 5$	$5 \times 1\frac{8}{9}$	$10 \times 3\frac{3}{4}$
$\frac{7}{8} \times 24$	$8\frac{5}{6} \times 6$	$2 \times 9\frac{8}{9}$	$3\frac{7}{8} \times 5$	$3\frac{4}{5} \times 10$
