

# Roll to Win

**Directions:** Each player rolls 4 dice or flip 4 digit cards. . Arrange the digits to win each round. The target is to get the greatest product, least product, greatest quotient and the least quotient.

| Player 1:                                   | Player 2:                                   |
|---|---|
| Round 1: Greatest Product                   |   |
| $\text{---} \times \text{---} = \text{---}$ | $\text{---} \times \text{---} = \text{---}$ |
| Round 2: Least Product                      |   |
| $\text{---} \times \text{---} = \text{---}$ | $\text{---} \times \text{---} = \text{---}$ |
| Round 3: Greatest Quotient                  |   |
| $\text{---} \div \text{---} = \text{---}$   | $\text{---} \div \text{---} = \text{---}$   |
| Round 4: Least Quotient                     |   |
| $\text{---} \div \text{---} = \text{---}$   | $\text{---} \div \text{---} = \text{---}$   |
