

SELF-ASSESSMENT

Choose a team to study at your site. Visit their PLC+ team meetings and observe classroom instruction. Then complete the following action planning with the team trends tool below. Identify the trends, in terms of strengths and challenges, and select a priority based on the data. Consider each member of the team and the team as a whole. Decide what you can accomplish with the team immediately and over the next few months. Finally, identify resources that you can use to support the team, as well as more specialized supports for individuals with greater needs. After all, schools have many teams, and each of them needs attention to cultivate their growth.
