

Water Containers: Plan

Important Questions

1. How many people is your container for?
2. Circle all the ways you want people to use it:

survivalhygienecooking
3. How long do you want it to last before it needs to be refilled or replaced?
4. Based on your decisions above and the information sheet, approximately how much water should your container hold?

Design Idea

- Draw a sketch of your design below.
- Use arrows to label what basic 3D shapes (such as cylinders, cones, rectangular prisms, etc.) you will use to build each part.
- Explain in words how people will use it.
