Two different sets of mixed numbers have a difference of  $\frac{3}{4}$ .

What could the mixed numbers be? Write the missing mixed numbers on the lines.

$$\underline{\hspace{2cm}} - \underline{\hspace{2cm}} = \frac{3}{4}$$

$$\underline{\hspace{2cm}} - \underline{\hspace{2cm}} = \frac{3}{4}$$

Use models, words, or numbers to justify one of your equations above.
