What if We Taught the Way Children Learn?

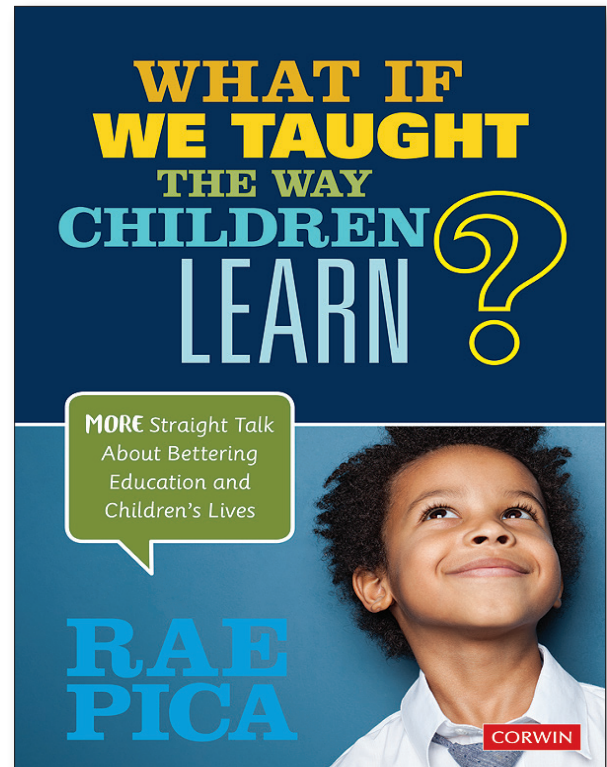

More Straight Talk About Bettering Education and Children's Lives

Rae Pica

We often teach our children in ways contrary to what we know about their development. What if our learning environments honored children's natural inclinations and used them to enrich their lives? To help students experience joy and discovery, while also preparing them for future schooling, we need to understand the connection between how they develop and how they learn. Written as a follow-up to the bestselling *What If Everybody Understood Child Development?*, this book includes:

- 31 easy-to-read chapters on topics including disruptive behavior, creativity, self-regulation, screen time, and mental health
- Suggested next steps and resources in every chapter
- Real-life examples from the author's and others' experiences

The straight talk in this book inspires readers to generate change so that children can have the lives and education they deserve.

\$24.95, 488 pages, ISBN:9781071803042

"Rae Pica's powerful, thought-provoking book provides rare and uncommon sense. This should be mandatory reading for all new teachers. Our kids would be MUCH better off if we practiced the way that this book suggests we do, and so would the educators around them."

- Eric Jensen, Educational Consultant and Author of "Brain-Based Learning"
