Learning that Transfers

Designing Curriculum for a Changing World

Julie Stern, Krista Ferraro, Kayla Duncan, and Trevor Aleo

Learning That Transfers empowers teachers and curriculum designers alike to harness the critical concepts of traditional disciplines while building students' capacity to navigate, interpret, and transfer their learning to solve novel and complex modern problems. Using a backwards design approach, this hands-on guide walks teachers step-by-step through the process of identifying curricular goals, establishing assessment targets, and planning curriculum and instruction that facilitates the transfer of learning to new and challenging situations. Key features include:

- Next-day strategies that offer tips for practical, immediate action in the classroom.

- Links to case studies, discipline-specific examples, and podcast interviews with educators.

- A companion website with templates, planning guides, and flexible options for adapting current curriculum documents.

Use this new framework to design curriculum and instruction that prepares your students to meet the challenges of the future while addressing the unique needs of your school community.

$34.95, ISBN:9781071835890

"It is a pleasure to have a full-length treatise on this most important topic, and may this focus on transfer become much more debated, taught, and valued in our schools."

—John Hattie
