TOOL FOR RESPONSIVE TEAMING: ORGANIZING DATA

This tool can be used by any team to facilitate the identification of desired changes in the fit between a learner's profile and schooling. The data that shows the current experience could be used for monitoring progress as teams move toward a successful fit.

Student name:

Team members:

Date:

TARGET FOR CHANGE These are broad areas where the student's learning profile and schooling are not yet a fit.	BRIEF DESCRIPTION OF CURRENT EXPERIENCE Be specific. What's not working? What happens when the fit between the student & schooling isn't working?	DATA THAT SHOWS CURRENT EXPERIENCE Link relevant data here (e.g., work samples, attendance records, behavior intervention data sheets, etc.)	DESCRIPTION OF SUCCESSFUL EXPERIENCE Describe what a successful fit between the student and learning would look like, sound like, feel like for the student/educator/family. The more specific the team can be, the better!

Additional experiences/cultural factors/student input to prioritize when planning:
